**Subject:** Re: Fw: Sulfolane

Brandon,

After I asked the question I realized I don't know what the site is; I was asked for help with domestic wells contaminated with sulfolane, but it's at North Pole, so it must be the same source, and clearly refineries are the source of releases of sulfolane.

I have gotten an agreement to put this chemical on the PPRTV and IRIS lists for researching toxicity. Now that I know you are involved, I will keep you posted. And if any tox/risk issues come up with your work at Flint Hills, feel free to contact me.

Marcia

Hi Marcia

Yes my site is in Alaska as well. It is the Flint Hills Resources Refinery in North Pole. Is this the same one you are working on?

---

Hi Brandon,

I am trying to help out ADEC on a site in Alaska with sulfolane contamination. Are you working on a site with it as a contaminant?

Thanks  
Marcia

I have been assured by STSC that sulfolane is in the queue for a PPRTV assessment this coming fiscal year. Sulfolane has been nominated to OSWER also for consideration for the IRIS program. I am forwarding some information from ATSDR that may be of use.

Hi David

Here is a copy of the ATSDR health consultation. Let me know if you need anymore information on the history of the site.
